Version 23B13-MM

Anti-hIL-6-IgG is a neutralizing monoclonal antibody against human interleukin 6 (hIL-6). Neutralizing activity of this antibody was determined using recombinant hIL-6 and HEK-Blue™ IL-6 cells. These HEK293-dervied cells allow the detection of bioactive human IL-6 by monitoring the expression of a STAT3-inducible SEAP (secreted embryonic alkaline phosphatase) reporter gene.

Dose-dependent inhibition of IL-6 response using Anti-hIL-6-IgG neutralizing antibody in HEK-Blue™ IL-6 cells. Anti-hIL-6-IgG was incubated with 1 ng/ml of hIL-6 for 30 minutes prior to the addition of HEK-Blue™ IL-6 cells. After overnight incubation, SEAP activity was assessed using QUANTI-Blue™ Solution. Data are shown in percentage (%) of neutralization.
